south dakota department of labor and regulation

southdakotasouthdakotasouthdakotasouth e-Labor Bulletin

September 2011

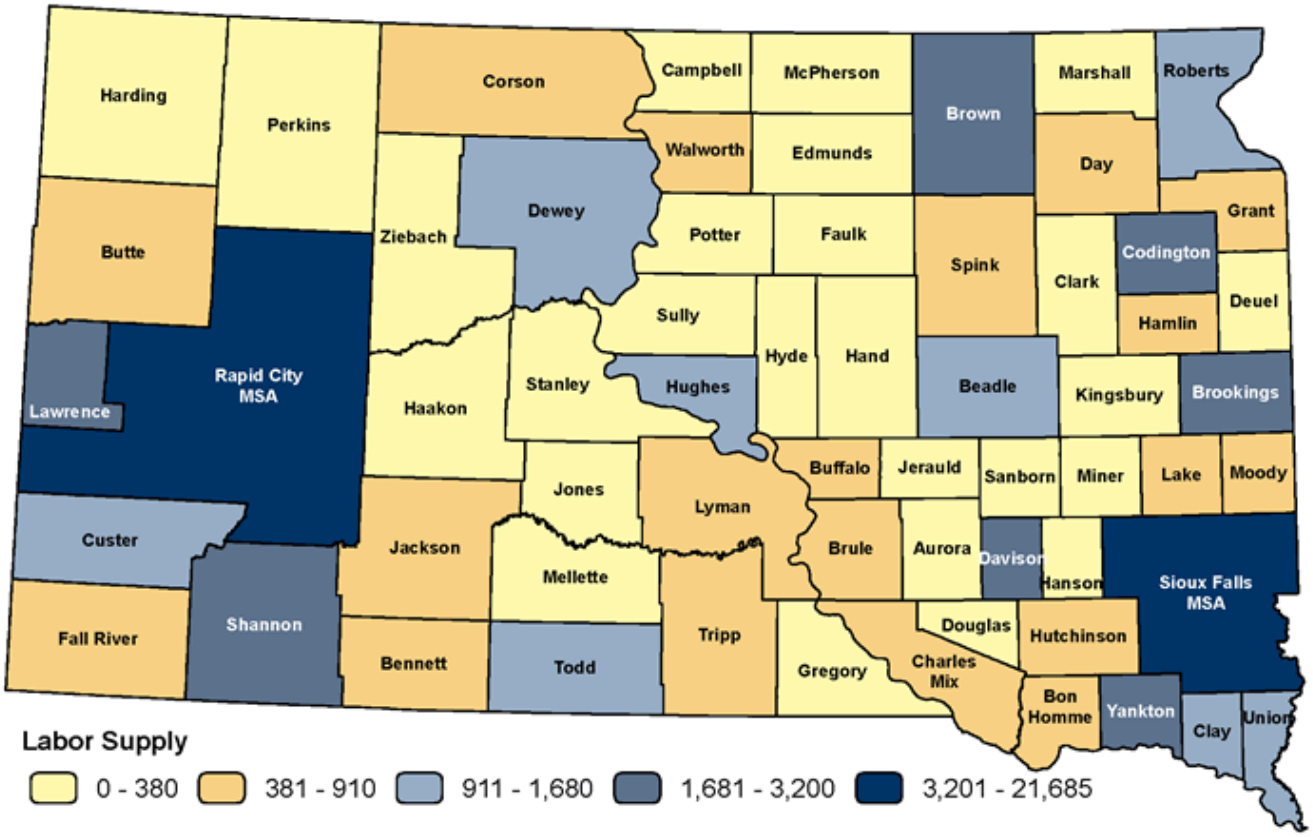
Labor Market Information Center **SD Department of Labor & Regulation**

Overview of the labor market in August

Labor Supply

The number of South Dakotans who would be available to staff a new or expanding business, or South Dakota's labor supply, was estimated at 81,635 in August 2011. Included in this labor supply are those who currently hold jobs (and would like to change) and those who, for a variety of reasons, do not have jobs. (See related data.) As a new feature of the e-Labor Bulletin, this monthly overview of the labor market will now include the following map of labor supply estimates by county.

South Dakota Labor Supply
August 2011



Labor Force

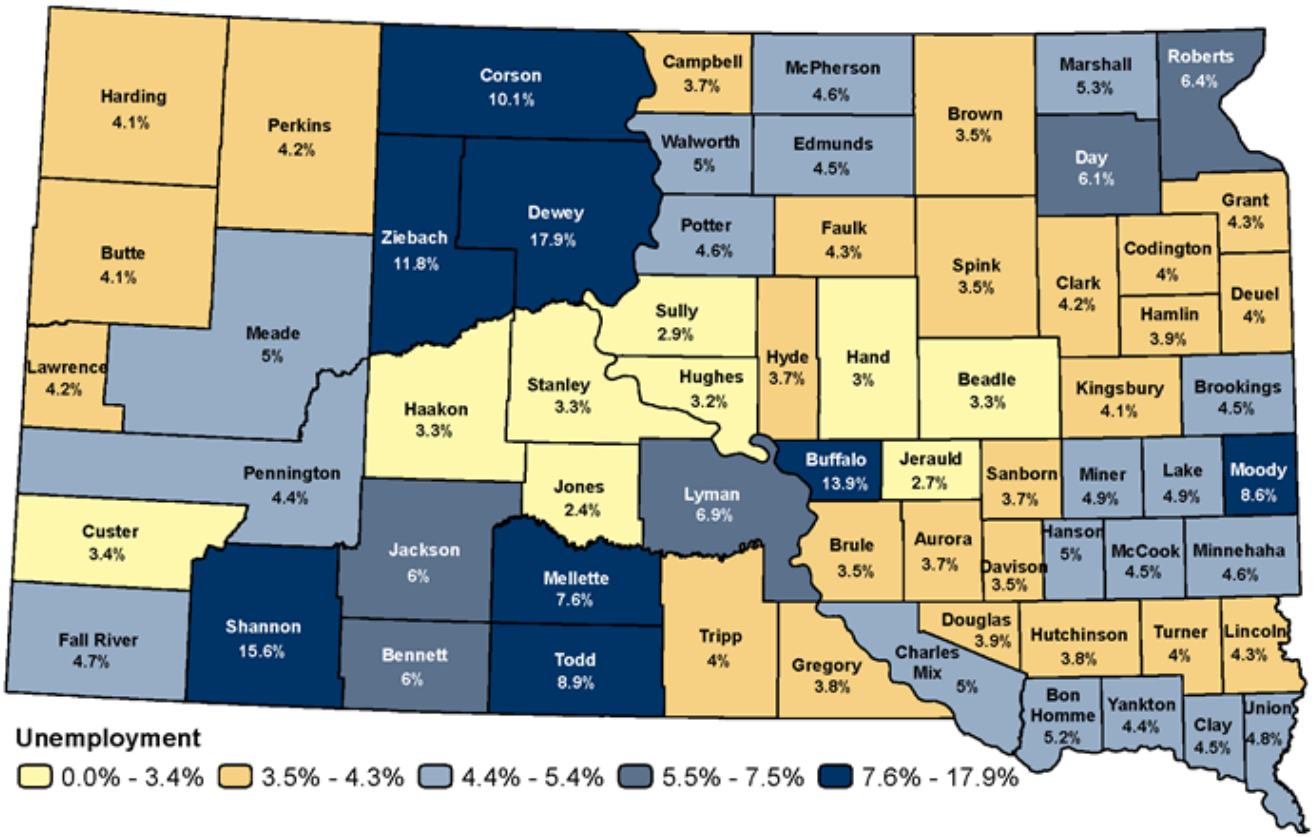
This data is seasonally adjusted.

Preliminary estimates show the August 2011 South Dakota labor force decreasing slightly by 100 over the month, while unemployment rose slightly at 200. The unemployment rate held steady at 4.7 percent from July to August.

Nationally, the seasonally adjusted unemployment rate also held steady from July to August, at 9.1 percent. The number of unemployed persons increased 36,000 over the month. The number of people in the labor force also increased from July to August.

Over the year, South Dakota's current total labor force of 447,100 is up compared to the level of 444,000 in August 2010. The level of employed increased by 2,600 persons. The level of unemployed was up slightly, by 500.

South Dakota Unemployment Rates by County
Not seasonally adjusted
August 2011



Notes about labor force data

The unemployment rate represents the number of unemployed as a percent of the labor force. People are classified as unemployed if they do not have jobs, have actively looked for work in the prior four weeks and are currently available for work. People who were not working and were waiting to be recalled to jobs from which they were temporarily laid off are also included as unemployed.

Labor force estimates for South Dakota are produced by the Labor Market Information Center in cooperation with the U.S. Bureau of Labor Statistics. The concepts and definitions underlying the labor force data come from the Current Population Survey (CPS), the household survey which is the official measure of the labor

force for the nation. The statewide estimate of the number of nonfarm jobs is a component of the model used to produce the labor force estimates. Other data used in this model include the number of continued unemployment insurance claims and survey data from the Current Population Survey (CPS) which is specific to the state.

Although state specific data is used in the production of the labor force estimates for South Dakota, the state monthly model estimates are controlled in "real time" to sum to national monthly labor force estimates from the CPS. Therefore, variation in the estimates of the employed and unemployed are somewhat controlled by what is happening nationally.

South Dakota Nonfarm Wage & Salaried Workers by Industry

This data is not seasonally adjusted.

Over-the-month comparisons

Based on a monthly survey of South Dakota establishments where employment data is collected for the pay periods that occur during the 12th of the month; preliminary estimates provided by the U.S. Bureau of Labor Statistics show South Dakota's total nonfarm wage and salaried worker employment level increased by 600 workers (0.1 percent) from July 2011 to August 2011. A seasonal increase is expected during this time frame, but the 0.1 percent gain is quite low when compared to averages for previous years.

Most industries reflected minimal worker losses or reduced seasonal growth. The exception was the leisure and hospitality sector, which added 1,600 workers (3.2 percent). However, there is a reason people often reference the saying, "One month's change does not a trend make." The August data is preliminary and subject to revision. It is customary to watch data movements for three months or so before any assumptions are made about a changing trend.

Over-the-year comparisons

Based on a monthly survey of South Dakota establishments, preliminary estimates provided by the U.S. Bureau of Labor Statistics (BLS) show the South Dakota total nonfarm wage and salaried worker level increased by 3,600 employees (or 0.9 percent) from August 2010 to August 2011.

There were notable jobs added within the private sector, including manufacturing (1,700 workers or 4.5 percent), health care and social services (900 workers or 1.6 percent), and leisure and hospitality (1,900 workers or 3.9 percent). The largest over-the-year loss occurred within the financial activities sector (1,000 workers or 3.5 percent).

The level of workers within government has been declining due to lower revenues related to a slow-growing economy and the depletion of federal stimulus funds. Overall, there was a decline in the level of government workers (1,700 or 2.3 percent), with all sectors being impacted.

Federal government had a loss of 400 workers (3.3 percent), with the majority of this loss related to the release of temporary workers hired by the U.S. Census Bureau to assist with the 2010 decennial census. State government had a loss of 400 workers (2.3 percent), and local government showed the largest loss with a 900 (1.9 percent) worker decline.
