### Administrative

- Update travel vouchers
- Email extract of every active permit in your database
  - Meetings and holidays sent out by office
  - Personal vacation sent out by inspectors
  - Note: All mass emails from Inspectors will be reviewed by JJ before mailing.
- Please inform the office when a JM is not present on a commercial installation.
- Make sure to request overtime.
- **Consistency** is so important
- Utilities are required to watch for permits prior to energizing a new installation.
  - Alert office if a violation occurs
- TKS – input every day
- Who owns the permit – Owner of the property? In my opinion you are reporting on the property and not the installer.
- SPAM – new BIT policy
- Listing or unlisted equipment – New and moved
  - Equipment moved that never had a field evaluation or certified will require a field evaluation or certification.
  - Only energize permitted or listed structures/equipment
- Inspecting process for unlisted equipment:
  - 1<sup>st</sup> step – require listing
  - 2<sup>nd</sup> step – require field evaluation
  - 3<sup>rd</sup> step – received inability to list by 3<sup>rd</sup> party.
  - 4<sup>th</sup> step – assess for designation

### Inspection Process

- Review inspection process slides provided by Scott
- Old permits – options to discuss
  - Send backs are approved by inspectors and conducted only by ED.
  - ~~Office handles old permits~~

Tabled until January:

- Service only with contractor permit – additional wiring pending
  - No additional wiring at point of inspection – final – service only
  - Additional wiring at point of inspection
    - Require permit from installer
    - No permit in 7 days – add EI (or EC) permit with fines
      - FV after 30 days with fees if no permit remitted

The only time you put down mileage is when you are on site.

- Input your reinspections and document in fees
- Hand delivering doortags for old permits and when in the area.
- Incorrect addresses on permits
  - inspector to update during inspection if able to find location
  - DT and charge inspection if time is utilized to attempt to locate bad address.
- Requested inspections are noted violations, not required corrections. Discussed the requested inspection process with home sales.
- Finalizing an inspection if the EC flew the coup: email sent 9/5/18 to Tim
- Documentation at installation once hard copy permits are eliminated.
  - Orange warning sticker with two blanks
- Bonding Inspections – Livestock, pools – JJ
- Assign a permit to the EC when informed who conducted an installation without a permit.
- Consistent way to inform licensees that the rough in has been completed and whether they can move on.
  - Rough in inspection with corrections – adhere yellow sticker
    - Add box: corrections required.
  - Rough in inspection passed – adhere blue sticker. Either remove yellow or place over the top of the yellow sticker.
  - Required to contact individual who requests notification.
- Document time, document Time, Document TIME: You are required to document:
  - inspections right after inspection unless special situations. FC, RFR and RFF can wait until convenient yet required within 24 hours of notification
  - information into the computer
  - additional time due to travel/poor directions
  - your day in the computer
- Document a FC with 0 number of units on your personal permit when a permit is not loaded during an inspection (RI, number of units, and mileage in remarks). Place a RI, units utilized when the inspection was actually conducted and current mileage on the permit when received.
- You are required to maintain follow up dates in a current status.
- You are required to attempt to contact an owner before accessing their property.
- You are required to attempt a response within 24 hours.
- No inspections unless a permit is received and loaded.

- You may inspect special projects in special situations: assess for \$100 fee.
- You may adjust the estimated units on permits within reason
- Do not put green stickers on installations that are not compliant – FV, FS, FT, requested inspections, HO wiring under an EC permit, and equipment designated as machinery.
- You must provide the option for a FS.
- If installer/owner calls back after DT, inform them they are required to call for inspection or extend permit if not done. Document in system. Set follow up date accordingly.

### **Reports**

- Write reports
- All inspectors should be requiring the same corrections as being documented in reports. If you do not agree with a correction, the inspector who does not agree is required to bring it to the attention to the group for discussion.
- Reports – Code requires or actual Code Section.
- You put violation code and we will create report
- Document your time writing reports
- Do not utilize terminology inconsistent with the law - nastygram
- Installations with violations which do not have to do with current permit
  - Commercial – document in report – office will create separate report
  - Residential – report for installation only with a notice provided. Green sticker with installation only.
- Please document receipt on reports tab for both IR and CO when notification for corrections is received for CO.
- Do not issue COs on HO permits
- FV before IR expires - No CO.

### **Fee Process**

- Reinspection fee vs. Minimum fee
- Review fee calculation
- Charge for your time
- Inspectors/Staff are absolutely not allowed to eliminate an assessed fee without permission from JJ.
- Units of time – Let's discuss units of time and when to assess.
- Do not inspect unless fees are paid.
- Administrative Fees
  - Recuperate cost
  - Failure to notify:
    - Utilize fee when no notification on old permit
    - Utilize fee when someone needs an inspection immediately
- DTs without notice documented will receive "Failure to Notify"
- Final small installations with one inspection per ECs request.
  - Finishing a basement does not qualify

- Three year old permits down to 1 year – for now let’s shoot for 2 years. Please finalize permits that are outstanding longer than two years. Move the follow up date, inform installers of their duties, and document that you have control of the permit and document spiel in remarks.

### Documentation of Inspections

- Daily contacts – JJ – review for FS/FV. More than one violation.
- Everyone is to have a personal permit.
- When to use FS or FV – See inspectors manual
- P – Use when you went for a RI or Final and couldn’t do one.
- RI or IR – Use RI when the inspection passes the rough in inspection. Document with an IR if a report is written requiring corrections.
- F or IR – Use F when the inspection passes the final inspection. Use IR when you cannot final due to corrections or you have adhered green stickers with minor items pending.
- Do not FV or FT a commercial or non-owner occupied installation.
- Inspection Documentation – Inspector Manual
  - P, RI, F, IR, RI, CO, DO, HT, FC

## Code Guidance

The following are provided as a courtesy because they are commonly referenced electrical wiring codes from South Dakota Codified Law (SDCL) and National Electrical Codes.

- 110.11 Structure status before a RI will be conducted:
  - Windows/Doors installed or openings enclosed with plywood, tarps or Tyvek.
  - Structure wrapped in Tyvek or similar material.
  - Shingles, tin, steel, or other roofing material installed (tar paper does not satisfy this requirement).
  - Soffits installed or soffit area enclosed.  
Note: Enclosures for windows, doors and soffits which protect the installation from the elements are acceptable.
- 210.52 & 20:44:22:23 If the back of a cabinet(s) is butted up to a stud wall, it is not considered an island or peninsula. Therefore the requirements in 210.52 pertain. (Note: recommend to install a circuit to be available for future utilization where not required.)
- 210.8 GFCI and AFCI receptacles in cabinets are considered readily acceptable unless behind an appliance.
- 210.8 A 10 - Guidance is to treat washing machine like a sink in a laundry area.
- 210.8 A 10 - Guidance is a cabinet is not considered a door, doorway or window.
- 210.8 B & 551.71 F 30 and 50 amp GFCI on pedestals – No GFCI required for residential, RV park (two or more), farmstead
- 210.12, Art. 100 and 90.4 - Specialty resort installations containing the 4 elements of a dwelling unit will be required to utilize AFCIs. (Permanent provisions for living, sleeping, cooking and sanitation).
- 210.12 A - AFCI is not required for 120V furnace circuit.
- 210.12 A - Outlets or devices which would include switches are required to be AFCI protected.
- 210.23 A 2 - Please note manufacturer's instructions for appliances and/or the 50 percent rule may require an appliance circuit to be dedicated.
- 210.52 A 2 1 – Outlets below the work surface satisfy the wall space requirement.
- 7 and under rooms
- 250.52 Concrete encased electrode - required to be connected to foundation or footing.
- 445.13 - The exception clarifies generators with breakers can be derated at 100 percent.
- 517 Chiropractor Office – Human medical would include chiropractor, eye
- 590 - All temporary power receptacles require GFCI protection.
- 680.42 C The 2017 NEC now allows NM cable to be installed between the service panel and the breakers disconnect for the outdoor hot tub.
- 702.4B2 - Utilize this article when sizing a generator utilizing an automatic transfer switch.
- Shunt trip breakers for "Machine Roomless" passenger elevators may be located in the elevator or in the building machine room
- Mini-split cable EC or HVAC installer – HVAC may install (listed assembly) yet required to follow manufacturer's instructions

## **Common Violations**

- Wiring Bulletin - Grounding electrode conductor must terminate at the neutral bar in the service.
- NEC 110.24 requires service equipment in other than dwelling units to have the available fault current labeled. The label shall have the date the calculation was figured and shall be able to withstand the environment involved.
- Size over current protection per name plate on equipment. Example air conditioner.
- NEC 406 Install weather resistant receptacles.
- NEC 408.4 - Labeling breakers

## **Changing Services**

- Current service locations are not grandfathered
- 110.26 – Access and working space shall be provided and maintained about all electrical equipment to permit ready and safe operation and maintenance of equipment.
- 210.12 If circuits are modified, replaced or extended over six feet, AFCI protection is required.
- S.D. Wiring Bulletin - Service conductors extending over five feet in a building could be run in rigid metal conduit up to 15 feet.
- 240.24(f) Services cannot be located in stairways, bathrooms, clothes closets, etc.

## **Documentation of Rough in Process**

- Rough in inspection with corrections – yellow sticker
- Rough in inspection approved – adhere blue sticker. (Yellow sticker removed or blue sticker adhered over yellow sticker.)
