

# Career Peek

**Nurses** take care of sick and hurt people. They help doctors look at and treat patients. They help with medical tests and give patients medicine. They try to help people stay well. They work in hospitals, clinics, nursing homes, schools and patients' homes.

**Count** the number of dots on each bandage. Put number in the square on the bandage.

This bandage is missing dots!  
There should be 24.  
How many are missing?

$$24 - \boxed{21} = \underline{\quad 3 \quad}$$

Put number from square here too.

This bandage is missing dots!  
There should be 18.  
How many are missing?

$$18 - \boxed{9} = \underline{\quad 9 \quad}$$

Put number from square here too.

at what you can become!
