

People in **science, technology, engineering & mathematics** use math and science in areas such as research, testing and development. Some design and conduct experiments. They collect data, answer questions and try to solve problems. Jobs include electrical engineers, physicists and mathematicians.

do you like

- learning about science?
- conducting experiments?
- building things from scratch?
- paying attention to details?
- figuring out how things work?

are you

- inquisitive (question why or how)?
- good at math?
- mechanically inclined?
- observant?
- organized?

related classes

- Physical Science
- Math
- Computers

hobbies, activities & groups

- Create projects for science fairs
- Read scientific or technical journals or blogs
- Science camps
- Building model airplanes
- Math clubs
- 4-H
