

Tap into workforce information

Tap into your Labor Market Information Center (LMIC) for information to guide your business decisions.

LMIC collects, analyzes and provides information on South Dakota's workforce. As the state's designee for federal-state cooperative programs with the U.S. Bureau of Labor Statistics (BLS), we survey South Dakota employers and operate other statistical programs to generate data about South Dakota's workforce.

A federal Workforce Information Grant allows LMIC to produce value-added information based on analysis of the data developed with the BLS. LMIC provides publications and online resources plus training and tailored responses to information requests that put understandable, useful workforce information into the hands of those who can benefit from it. This includes employers, career decision makers, and education, economic development, job placement and training program planners.

Data available from LMIC includes:

- › Occupational wage estimates
- › Worker levels and pay by industry
- › Employee benefits
- › Employment projections
- › Labor supply estimates
- › Worker commuting data
- › Turnover rates

Connect with LMIC to tap into the power of information.
