

Covered Workers & Annual Pay - 2014 Annual Summary

Introduction

South Dakota's Quarterly Census of Employment and Wages publication displays information about workers covered by South Dakota Unemployment Insurance law and the Unemployment Compensation for Federal Employees (UCFE) program. Covered workers include employees who are paid a wage or salary during the year; it excludes the self-employed and unpaid family workers. Wage and salaried workers are covered regardless of type of ownership. Employees working at privately owned businesses and federal, state and local government agencies are all included.

However, not all employees are covered workers. South Dakota wage and salaried workers not covered by South Dakota Unemployment Insurance law include railroad employees, government elected officials, election workers, work-study students and religious organization employees. (Some religious organizations may opt to provide unemployment insurance coverage to their employees; therefore, would be could be included in this publication. Nonprofit organizations may or may not be covered by unemployment insurance, depending upon whether or not they meet specific employment requirements.

Smaller businesses may also be exempted from coverage if they do not meet unemployment insurance law minimum payroll and employment criteria. Businesses who hire only a few workers on a part-time or seasonal basis, such as agricultural businesses, make up a large part of the exempted group.

Each employer in South Dakota who is covered by unemployment insurance is assigned an industry classification and a county code. The industry classification is determined by the business activity and type of ownership and the county code is determined by worksite location (store, branch, office, etc.).

Only data from covered employers is included in this publication. State laws protect confidentiality of individual employer data. Data are not presented if an industry classification consists of less than two employers.

The data in this publication is based on the unemployment insurance reports submitted by South Dakota employers and data gathered by the Labor Market Information Center (LMIC) in cooperation with the U.S. Bureau of Labor Statistics. Although the unemployment insurance reports are based on employer serial number, the LMIC gathers additional data by establishment. A covered employer could include one or more establishments. Those establishments could be conducting business at one or more worksite locations. Each establishment is given an industry and county code. Data for 2014 in this publication are preliminary and subject to revision. Because of late reporting by covered private and government employers, some data in this publication may be imputed.

Summary of South Dakota Covered Workers & Annual Pay in 2014

The number of employees covered by unemployment insurance in 2014 was 410,938 workers. This represents an increase of 1.6 percent from 2013. This chart indicates that ten industries showed worker gains while one industry decreased during 2014. In 2014, the number of covered wage and salaried workers equaled 95.9 percent of South Dakota's wage and salaried workers. Covered workers are counted at their place of work. A person who works for more than one covered employer is counted at each job.

Covered Workers by Ownership and Industry Group 2013 - 2014 Change

Annual Pay of Covered Workers

Annual pay reflects total compensation paid to covered workers in the form of wages, salaries, bonuses, commission and overtime pay during the year. Annual pay is calculated by dividing total payroll by the average number of workers. The statewide annual pay for workers covered by unemployment insurance for 2014 was \$38,689. This represents an increase of 3.9 percent from 2013.

Annual pay is affected by the number of hours worked and the rate of pay. Full-time workers normally have higher annual pay than part-time workers do. Many of the industries with the lowest annual pay have a large percentage of part-time jobs. Industry specific annual pay is determined by the mix of full-time and part-time workers and high-paying and low-paying jobs. The leisure and hospitality industry group has the lowest industry annual pay of \$14,553 because these types of businesses typically hire many part-time workers. Federal government workers have the highest annual pay at \$59,798.

Annual Pay of Covered Workers by Ownership and Industry Group 2013 - 2014 Change			
	2013	2014	Percent Change

Covered Workers & Annual Pay - 2014 Annual Summary by Establishment Size

Establishment size data provides a comparison of the number of small and large businesses in South Dakota. The average number of workers at the worksite location determines establishment size. A worksite is generally defined as a single physical location at which predominantly one type of economic activity is conducted.

Chart A displays the number of South Dakota establishments by establishment size. This chart shows small businesses are predominate in South Dakota. During 2014, the 0-9 workers size class had the largest number of establishments, accounting for 77.5 percent of all establishments.

The distribution of employees by establishment size shows a different picture than the distribution of establishments. Smaller businesses have a much smaller slice of the pie. Chart B indicates that smaller businesses (less than 10 workers) employed only 19.6 percent of the covered workers in South Dakota in 2014. The number of workers is evenly dispersed among the establishment size groups.
