

20:44:14:01. General definitions. Terms defined in SDCL 36-16-2 have the same meaning when used in this article. In addition, terms used in this article mean:

(1) "Commission," the State Electrical Commission;

(2) "Inspector's report procedure," a procedure that requires the installer to notify the inspector regarding the status of the corrections required, as listed on an inspector's report by the day specified;

(3) "Correction order," a notice written by an inspector to the person responsible for the electrical installation, listing the violations of this article and stating the time allowed for correction;

(4) "Electrical lineman," a person with a minimum of four years of experience with electrical power distribution systems;

(5) "Electrical school," as referred to in SDCL 36-16-2(4), a four-year educational institution which grants an electrical engineering degree (BSEE) and which is accredited by a nationally recognized accreditation agency;

(6) "Electrical wiring apprenticeship program," a classroom program supplemented by a minimum of 144 hours a year of electrical wiring instruction in conjunction with the normal 2,000 hours a year of actual electrical wiring on-the-job work experience of an apprentice electrician;

(7) "Final subject," the act of closing out a non-compliant residential installation after all inspections have been performed and the residence owner of the installation acknowledges acceptance of the report of non-compliance;

~~(7)~~ (8) "Final void," the act of closing out a non-compliant installation prior to the full inspection being completed;

~~(8)~~ (9) "License," a license issued to a person who qualifies under one of the classes defined in SDCL 36-16-2 or is granted reciprocity from another state;

~~(9)~~ (10) "Local inspection system," a municipal government or power supplier that has complied with commission requirements and which provides local electrical inspections under the rules and direction of the commission and SDCL chapter 36-16;

~~(10)~~ (11) "Modular home" or "modular structure," a home or other structure built on a factory assembly line or other construction site to International Building Code specifications and transported to its destination in sections or as a complete assembly, which has no permanent steel chassis attached and is not a manufactured home as defined in SDCL 32-7A-1 or a recreational vehicle;

~~(11)~~ (12) "**National Electrical Code**," the **National Electrical Code**, published by the National Fire Protection Association (~~2017~~ 2020 edition) with the following exceptions:

(a) Article 100 – definitions - remove the new word "machinery" from the definition of "equipment";

(b) Eliminate GFCI and AFCI requirement for life support equipment and like/similar equipment as determined by Authority Having Jurisdiction;

(c) Clarify section 334.10. Uses permitted. Type NM, Type NMC, and Type NMS cables may be used in the following structures:

(i) One- and two family dwellings and accessory structures;

(ii) Multifamily dwellings, farmsteads, and accessory structures of Types III, IV, and V construction except as prohibited in 334.12; and

(iii) Other structures permitted to be of Types III, IV, and V construction except as prohibited in 334.12. Cables shall be concealed within walls, floors, or ceiling that provide a thermal barrier of material that has at least a 15-minute thermal finish rating as identified in listing of fire-rated assemblies;

~~(12)~~ (13) "Owner's exemption," an exemption from licensure requirements in SDCL 36-16-13 for an individual owner who is personally ~~installing electric wiring and fixtures in a residence or farmstead which is owned and resided in or on by the person installing the electrical wiring or fixtures~~ wiring an electrical installation on a residence or farmstead;

~~(13)~~ (14) "Point of service attachment," as referred to in SDCL 36-16-16(1), that point where the power supplier's conductors connect to the consumer's conductors;

~~(14)~~ (15) "Wiring permit," a form notifying the commission that a described electrical installation will be made in accordance with the requirements of this article at a described location;

~~(15)~~ (16) "Wiring permit--Form B," a wiring permit to be used in an area where the commission has approved local inspection systems;

~~(16)~~ (17) "Wiring school," a postsecondary school that teaches one or more courses in electrical wiring which covers the topics listed in § 20:44:16:12 and includes at least 576 hours of instruction on those topics.

CHAPTER 20:44:18

WIRING PERMITS

Section

20:44:18:01 Wiring permit required.

20:44:18:02 Obtaining a wiring permit.

20:44:18:03 Wiring permit procedure.

20:44:18:04 Wiring permit procedure for state-owned structures being wired by state employees licensed to do electrical installations.

20:44:18:05 Local inspection systems.

20:44:18:06 Criteria for permits for single-family dwelling units under an Owner's Exemption.

20:44:18:02. Obtaining a wiring permit. Wiring permits may be obtained for ~~\$10~~ \$15 each from the commission office ~~by calling 1-800-233-7765.~~

An owner doing wiring in compliance with SDCL 36-16-15 may obtain wiring permits from the commission office, ~~from power suppliers,~~ or from state electrical inspectors for ~~\$10~~ \$15 each.

Wiring permits are valid for ~~a maximum of~~ three years from the date the permit is ~~taken out~~ issued. Electrical installations that extend beyond three years from that date must have new wiring permits posted and sent to the commission office before the expiration of the three-year limit. Failure to date the wiring permit at the start of the job constitutes a late wiring permit procedure and subjects the installer to a \$100 administrative fee. Failure to renew the permit on electrical installations that are not completed constitutes a late wiring permit procedure which subjects the installer to a \$100 administrative fee.

General Authority: SDCL 36-16-12, 36-16-27, 36-16-30.

Law Implemented: SDCL 36-16-28, 36-16-30.

20:44:18:06. Criteria for permits for single-family dwelling units under an Owner's

Exemption. A permit for wiring a person's residence may only be issued under the following conditions:

(1) The applicant has not applied for a permit under the Owner's Exemption in the last three years;

(2) The applicant occupies or intends to occupy the residence as his or her personal dwelling unit;

(3) The applicant does not rent or lease any part of the residence; and

(4) The applicant or applicant's spouse are the only persons performing the wiring.

A permit utilized in violation of this section will be receive a final subject or final void.

General Authority: 36-16-15.

Law Implemented: 36-16-15.

20:44:19:05. Final inspection with an inspector's report. If an installation is nearly complete and the inspector is satisfied that any minor infractions remaining will not constitute a hazard to life or property, the inspector may issue an inspector's report. The inspector shall submit the inspector's report to the electrical contractor, Class B electrician, or individual doing electrical wiring under an owner's exemption, subject to those corrections specified in the inspector's report. The inspector may sign, date, and apply the final green tag on or near the service disconnect.

The installer shall correct all noted violations and notify the inspector of those corrections by the date specified on the inspector's report and in compliance with § 20:44:19:07.

If the installer fails to notify the inspector by the date indicated on the inspector's report, the inspector shall issue a correction order to the installer ordering compliance with SDCL chapter 36-16 and this article. The inspector shall assess fees according to § 20:44:20:12.

If the installer fails to comply with the terms of the correction order or fails to pay the fees according to § 20:44:20:12, the inspector may final void the installation with notice of non-compliance to installer, order a disconnect, or make a compliance request of the electrician's undertaking fund. In addition, the commission may conduct a hearing to determine whether the violator's license should be revoked.

If at any time during the process the owner of a residential or farmstead installation refuses to allow for corrections by an installer the inspector shall final void or final subject the installation with notice of non-compliance to installer or order the service disconnected. If at any time during the process the owner of a commercial installation refuses to allow for corrections the inspector shall order the service disconnected.

If an owner performing electrical installations under an owner's exemption refuses to make corrections, the inspector shall provide an inspection report to the owner, final void or final subject the installation with notice of non-compliance to ~~installer~~ owner, or order the service disconnected. The owner shall correct all noted violations and notify the inspector of those

corrections by the date specified on the inspector's report and in compliance with § 20:44:19:07. If the owner fails to notify the inspector by the date specified on the inspector's report, the inspector shall issue a correction order to the owner ordering compliance with SDCL chapter 36-16 and this article. The inspector shall assess fees according to § 20:44:20:12.

Violations considered inconsequential to the safety of life and property do not require an inspector's report, and corrections may be made at the convenience of the installer. This status may change with the next inspection.

Law Implemented: SDCL 36-16-12.

20:44:20:01. Inspection fees for new residential electrical installations. Inspection fees for all new single-family residential electrical services are based on service equipment ampere capacity as follows:

- (1) ~~0 to~~ through 200 amperes, ~~inclusive: \$135~~ \$160, and includes one rough-in inspection;
- (2) ~~201 to~~ through 400 amperes, ~~inclusive: \$275~~ \$300, and includes two rough-in inspections;
and
- (3) 401 amperes and over: \$300 plus circuits, and includes two rough-in inspections;

In addition to the rough-in inspections set forth in this section, each installation under this section includes one final inspection. Additional requested inspections or reinspections to address corrections detailed in a report for a rough-in or final inspection may be assessed fees under § 20:44:20:10.

Law Implemented: SDCL 36-16-30.

20:44:20:02. Inspection fees for service connections on other electrical installations.

Inspection fees for electrical service connections on new installations, ~~such as including~~ new service installations on commercial installations and new service installations not covered in this chapter, are based on service equipment ampere capacity as follows:

(1) ~~0 to~~ through 200 amperes, ~~inclusive: \$35~~ \$60 plus circuits, and includes one rough-in inspection;

(2) ~~201 to~~ through 400 amperes, ~~inclusive: \$50~~ \$75 plus circuits, and includes one rough-in inspection;

(3) ~~401 to~~ through 800 amperes, ~~inclusive: \$75~~ \$100 plus circuits, and includes one rough-in inspection;

(4) 801 ~~to~~ through 1600 amperes, ~~inclusive~~: ~~\$125~~ \$150 plus circuits, and includes one rough-in inspection; and

(5) 1601 amperes and over: ~~\$250~~ \$275 plus circuits, and includes two rough-in inspections.

Inspection fees for electrical service connections on existing installations, ~~such as~~ including replacement service installations for existing homes, commercial installations, and installations not covered in this chapter, are based on service equipment ampere capacity as follows:

(1) 0 ~~to~~ through 200 amperes, ~~inclusive~~: ~~\$75~~ \$100 plus new circuits;

(2) 201 ~~to~~ through 400 amperes, ~~inclusive~~: ~~\$100~~ \$125 plus new circuits;

(3) 401 ~~to~~ through 800 amperes, ~~inclusive~~: ~~\$125~~ \$150 plus new circuits;

(4) 801 ~~to~~ through 1600 amperes, ~~inclusive~~: ~~\$150~~ \$175 plus new circuits; and

(5) 1601 amperes and over: ~~\$175~~ \$200 plus new circuits.

Fees for remodeling single family residences may not exceed the flat rate fee for comparable new single family residential electrical services in § 20:44:20:01. In addition to the rough-in inspections set forth in this section, each installation under this section includes one final inspection. Additional requested inspections or reinspections to address corrections detailed in a report for a rough-in or final inspection may be assessed fees under § 20:44:20:10.

Law Implemented: SDCL 36-16-30.

20:44:20:03. Inspection fee for circuit installations or alterations. Inspection fee for circuit installations or alterations, including commercial installations, new installations in existing homes, and other installations not covered by this chapter is \$50 per circuit.

Fees calculated in this section may not exceed the calculated fee for a new installation of the same type in §§ 20:44:20:01 and 20:44:20:02. A one- or two-circuit installation or alteration includes one inspection. An installation or alteration of three or more circuits includes two inspections. Additional requested inspections or reinspections to address corrections detailed in a report for a rough-in or final inspection may be assessed fees under § 20:44:20:10.

Law Implemented: SDCL 36-16-30.

20:44:20:04. Inspection fees for electrical installations associated with remodeling projects.

When neither the service nor the branch circuits are altered, inspection fees associated with a remodeling project, including remodeling work in existing homes, are as follows:

- (1) First 40 openings or connections: ~~\$1~~ \$2 each;
- (2) Each additional opening or connection: \$0.50;
- (3) First 40 lighting fixtures: ~~\$1~~ \$2 each;
- (4) Each additional lighting fixture: \$0.50; and
- (5) Each motor or other special equipment: \$6.

Each permit under this section includes one inspection. Additional requested inspections or reinspections to address corrections detailed in a report for a rough-in or final inspection may be assessed fees under § 20:44:20:10.

Law Implemented: SDCL 36-16-30.

20:44:20:06. Inspection fees for electrical installations serving outdoor signs and area lighting. The inspection fee for outdoor sign feeders or branch circuits and for area lighting is calculated as follows:

(1) For outdoor sign feeders or branch circuits, the greater of (a) or (b), as follows:

(a) \$50 for each outdoor sign feeder or branch circuit; or

(b) The fee calculated ~~pursuant to~~ in accordance with §§ 20:44:20:02 and 20:44:20:02.01, with a maximum of \$60;

(2) For area lighting, the fee calculated ~~pursuant to~~ in accordance with §§ 20:44:20:02 and 20:44:20:02.01, with a maximum of \$60.
