SCHEDULE A RULES FOR IDENTIFYING DEATH MATCHES

In comparing Company's Records of its insured's, annuitants, Annuity Contract owners, and retained asset account owners against the DMF, and any updates thereto, the governing principle to be followed shall be establishing whether or not a unique biological individual identified within the Company's data is the same as a unique biological individual identified on the DMF in a case where a benefit is due and payable. In comparing the Company's Records of its insured's, annuitants, Annuity Contract owners, and retained asset account holders against the DMF, the Company shall utilize the following set forth below as the minimum standard for determining what constitutes a match.

Category 1: "Exact" Social Security Number Match occurs when the Social Security Number contained in the data found in the Company's Records matches exactly to the Social Security Number contained in the DMF.

Category 2: Non-Social Security Number Match occurs in any of the following circumstances:

1. The Social Security Number contained in a the Company's Record matches in accordance with the Fuzzy Match Criteria listed below to the Social Security Number contained in the DMF, the First and Last Names match either exactly or in accordance with the Fuzzy Match Criteria listed below and the Date of Birth matches exactly.
2. The Company's Records do not include a Social Security Number or where the Social Security Number is incomplete (less than 7 digits) or otherwise invalid (e.g., 111111111, 999999999, 123456789), and there is a First Name, Last Name, and Date of Birth combination in the data produced by the Company that is a match against the data contained in the DMF where the First and Last Names match either exactly or in accordance with the Fuzzy Match Criteria listed below and the Date of Birth matches exactly, subject to paragraph 3 immediately below.
3. If there is more than one potentially matched individual returned as a result of the process described in paragraphs 1 and 2 immediately above, or if both the Social Security Number and Date of Birth found in the Company's Records match in accordance with the Fuzzy Match Criteria listed below, then the Company shall run the Social Security Numbers obtained from the DMF for the potential matched individuals against Accurant for Insurance or an equivalent database. If a search of those databases shows that the Social Security Number is listed at the address in the Company's Record for the insured, then a Category 2 Match will be

considered to have been made only for individuals with a matching address.

4. If the Company's systems do not contain a complete "Date of Birth" exact match will be found to exist where the data that is available on the Company's systems does not conflict with the data contained in the DMF. By way of example, if the Company's systems only contain a month and year of birth, an exact "Date of Birth" match will exist if the DMF record contains the same month and year of birth.
5. Additionally, if the Company's systems only contain a year of birth or contain a complete date of birth that includes a month and day of 1/1 (i.e., January 1) followed by a year of birth, the Date of Birth will be deemed to match exactly where the year of birth in the data that is available on the Company's systems is within one (1) year of the year of birth listed in the DMF. By way of example, if the Company's systems contain 1/1/1934, an "exact" Date of Birth Match will exist if the DMF record contains a year of birth of 1933, 1934, or 1935.

Fuzzy Match Criteria:

1. A "First Name" fuzzy match includes one or more of the following:
 - a. First Name nicknames: "JIM" and "JAMES."
