**Notes:**  
Occupational Code/Title for OEWS - In a few cases, the Occupational Code and Occupational Title the U.S. Bureau of Labor Statistics use for the Occupational Employment and Wage Statistics (OEWS) program (the basis for the employment projections and for the wage data above) are not officially included in the Standard Occupational Classification (SOC) taxonomy and are unique to the OEWS program. These "pseudo" OEWS codes lead to problems with how the virtual labor market data system displays data within the Occupational Profiles. Employment and wage data for those occupations appears to be "confidential" and not available within the Occupational Profiles, but the data are available elsewhere. This PDF file was created as a convenience for our users to provide the "missing" occupational data.
