The **mean wage** is also known as the average wage. The mean wage is calculated by dividing the estimated total wages for an occupation by the number of workers in that occupation. **Percentile wages** represent the percentage of an occupation's workers who earn less than or equal to that wage. The **median wage** is the 50th percentile: 50% earn less than or equal to this amount; 50% earn more.

The Cross-State Sioux City Metropolitan Statistical Area (MSA) consists of the South Dakota county of Union; Woodbury County, Iowa; and Dakota County, Nebraska; see Counties included in Wages Areas.

For more information on percentile wages, see technical notes.
