

# South Dakota Career Peeks

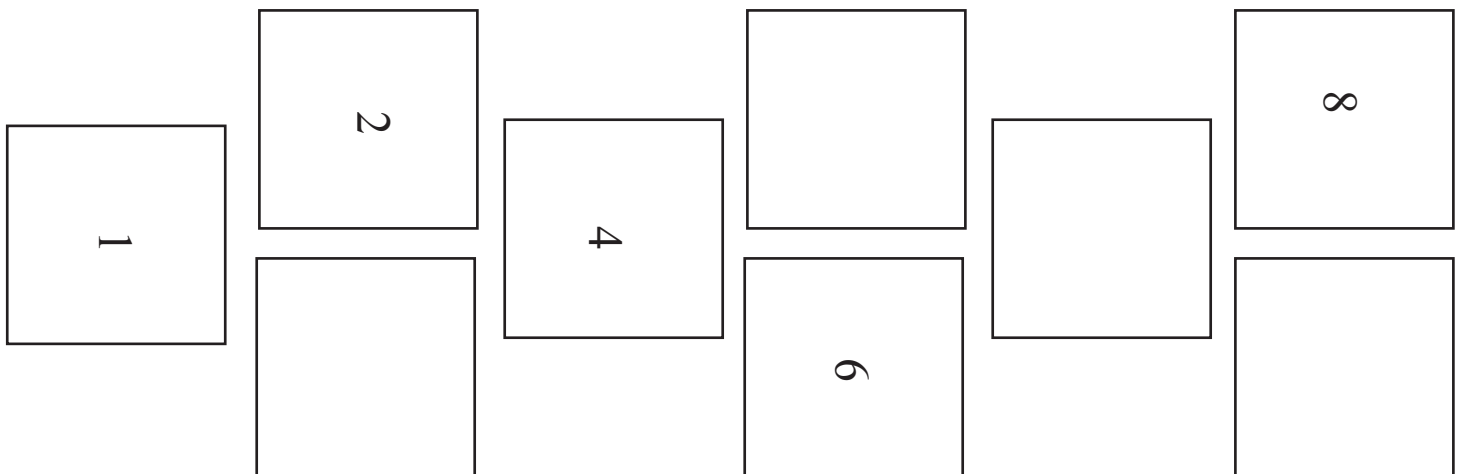

Architecture  
& Construction  
Cluster

**Cement Masons** use concrete to build walls, sidewalks and fences. They smooth out the concrete once it is poured.

Some add color to concrete. They may use tools to make a pattern on the surface. Cement masons must know how the weather affects the hardening of the concrete to avoid cracks.

Suppose you are a cement mason hired to make a sidewalk for a hopscotch game. Fill in the missing numbers to find how many blocks are needed to complete the sidewalk.

Take a  peek

at what you can become!
