

## An interest assessment helps identify careers you would enjoy

What activities interest you? Where do your career interests fall? Take the following career interest survey to help you target some general types of careers that interest you from the hundreds of possibilities.

1. Assess how well you'd like to do each work-related activity on pages 2-3 by circling a rating for the activity. Use the rating scale provided on each page.
2. Remove the answer sheet on page 4 to score your assessment. Follow the instructions on the answer sheet.
3. Once you've determined your primary, secondary and third highest interest areas using your answer sheet, find the corresponding interest areas on our Exploring Occupations of Interest web page at the following location.

[dlr.sd.gov/lmic/menu\\_sdcis\\_groups.aspx](http://dlr.sd.gov/lmic/menu_sdcis_groups.aspx)

The six interest groups listed there are the same groups used in the South Dakota Interest Survey. Since people work better in occupations that match their interests and personality, these occupations are grouped to reflect what people with these interest areas like to do.

4. Once you choose an interest area and click on a specific occupation included in that interest area, you will see comprehensive information on that specific occupation in our virtual labor market information system. Look through all the career options in your highest three areas of interest.
5. Use the virtual labor market data system and other resources available from school counselors, teachers, South Dakota Department of Labor and Regulation local offices or public libraries to explore those occupations further.

1. Design an office building.
2. Broadcast the evening news.
3. Inspect buildings to detect fire hazards.
4. Develop programs to control machining or processing of metal or plastic parts by automatic machines.
