

Eligible Training Provider: New Course Application Approvals

Providers of training services are required to be on the Eligible Training Provider List (ETPL) in order to receive WIOA Title I Adult, Dislocated Worker and Out-of-School Youth funding. Training services are provided through Individual Training Agreements (ITA). Eligible training providers allowed to receive ITAs are included in the following categories:

Category 1: An institution of higher education with a program resulting in a recognized post-secondary credential.

Category 2: An entity with programs registered under the National Apprenticeship Act.

Category 3: A public or private provider of a training service program, including joint labor-management organizations and eligible providers of adult education and literacy activities under Title II, if such activities are provided in combination with occupational skills training.

Build Dakota | South Dakota Department of Labor and Regulation

Approve Deny

South Dakota Department of Labor and Regulation (SDDLRL) would like to align the Eligible Training Provider List with the Build Dakota approved eligible programs. Along with Build Dakota, SDDLRL also observes high demand occupations. As a program is approved by Build Dakota and are interested, SDDLRL would automatically approve the program to be on the SDDLRL website as an approved training provider and program.

- **Welding**
24 months for each Welding class | Program Cost: \$3,000 | Credential: Leading to an Industry Recognized Certificate
- **Facilities Maintenance Technician Program**
16 Weeks (20 hours of training per week) | Program Cost: \$4,450 | Credential: Leading to an Industry Recognized Certificate

TeachOut, Inc. Is Now Loenbro Technical Institute | February 17, 2017
<http://loenbro.tech/teachout-inc-now-loenbro-technical-institute/>

“When TeachOut, Inc. began in 2012, we were excited to bring quality welding instruction to the region. In 2016, we entered a new phase of our life with an acquisition of the school by Loenbro, Inc. The founders of Loenbro are no strangers to the rigors of welding — in fact, it’s where they got their start. Paul and Jon Leach started working on the family farm, where they learned

the value of hard work and determination. They then went off to welding school, and when they returned home with increased skills and education, they immediately began work in a refinery in Montana — a journey that eventually led them to founding their own company, and becoming a major employer in the industry, both in Montana and beyond.

Based in Great Falls, MT, Loenbro offers more than just welding services, they're a major provider of pipeline and oilfield services, industrial services, fabrication, inspection and so much more across the region and the country. Their interest in the school, now known as the Loenbro Technical Institute, is to ensure that quality welding instruction continues to grow in the region.

You can still count on LTI for intense, hands-on welding education in an environment that fosters excellence and grows the career prospects for each student. We're still based in Rapid City, SD, and will continue to support the community and region with quality educational opportunities that we're proud of".

Classification of Instructional Program (CIP) Code: 52.0703

- **Human Services Technician**

24 months | Program Cost: \$10,505 | Credential: Leading to an Associate Degree

- The Human Services Technician program is designed to prepare people for positions in a variety of agencies and organizations that provide human and social services. Students will study various aspects of human behavior and services, and will be trained to observe and interview patients, carry out treatment plans and handle crises in a variety of difficult situations. They will be introduced to a wide range of human service organizations and resources needed to serve their clients effectively. Actual fieldwork experience in a community human services agency under the supervision of a working professional is required. This two-year program will prepare students for future work in social services in many areas. The curriculum will allow students to attain certificates in a variety of areas such as Juvenile Justice, Disabilities, and Youth Services while enrolled in the program. The Associate degree and additional certificates prepares graduates for work in residential facilities for youth or adults, case management, retirement

Approve Deny

24 months | Program Cost: \$21,069 | Credential: Leading to an Associate Degree

- The Culinary Academy of South Dakota at Mitchell Technical Institute has a long and honored tradition in the upper Midwest. This program combines traditional campus instruction with apprenticeship training in other South Dakota communities including major convention centers and hotels. Learning to cook in the MTI kitchens, students master the techniques of food preparation, sanitation and service in a large operation. Fulfilling all the positions in modern food service, students move easily from kitchen to front-of-house, learning as they work. The program provides daily food service to MTI students, staff and guests, short order service and elegant Oakroom dining in MTI's prestigious on-campus restaurant.

- **Professional Truck Driving**

16 weeks | Program Cost: \$4,970 | Credential: Leading to a Certificate of Completion of an Apprenticeship

Approve Deny

- Today the industry is facing a critical shortage of drivers. Driving a commercial vehicle require a high level of knowledge, experience, skills, and physical abilities. In order to obtain a Commercial Driver's License (CDL), an applicant must pass both skills and knowledge testing. Additionally, CDL holders are held to a higher standard when operating any type of motor vehicle on public roads.
- Mitchell Technical Institute can provide the proper training to ensure an adequate pool of qualified drivers in South Dakota and surrounding states. This program has been developed using standards set by the Professional Truck Driving Institute, the only certification recognized by the trucking industry.
- Students will spend eight weeks in a learning environment before enrolling in an eight week over-the-road internship.

- All courses are offered for credit through MTI's Advanced Technical Education division.

- **Licensed Practical Nursing (LPN)**
***Approved Build Dakota Program**

Approve Deny

12 months | Program Cost: \$14,186 | Credential: Leading to a Post-Secondary Diploma

- Program focuses on the art and science of nursing, and is taught in classrooms, MTI's state of the art high-fidelity medical simulation laboratory, and in clinical practice settings. Students attend class, skills labs and clinical simulation experience on campus. Additionally, students participate in clinical learning experience in various healthcare settings in surrounding communities and simulated clinical experiences under the guidance of nursing faculty. Clinical experiences provide students with the opportunity to apply nursing theory and critical thinking skills to patient care situations to help develop sound clinical judgement.
- General Education courses in the nursing curriculum are offered in traditional and online format. Students may elect to complete general education courses prior to entering the program.
- Graduate of the program find jobs in a variety of health care settings including long-term care facilities, home health care agencies, state and federal health-related facilities, private duty nursing, clinics, and office settings.

9 months | Program Cost: \$10,000 | Credential: Leading to an Associate Degree

- The Plumbing Technology program prepares the student to begin a career in plumbing and pipe fitting. Coursework provides the student with technical understanding and skills development and integrates theory with practical experience. Through the program, the student develops skills in piping techniques and procedures, plumbing and piping systems, residential and commercial system installations, blueprint reading and isometric interpretation.
- The successful graduate is eligible for 800 hours on his or her apprenticeship card and employment at an advanced apprenticeship level in a variety of businesses found in rural and metropolitan areas.
- The curriculum has not made it through the Curriculum Committee as the lead instructor just started this week. The program schematic I provided is what was created in 2013-2014 when plans were in place to start the Plumbing program. I do not know specifics yet as to the cost for the program because we are not at the phase to determine credit hours in the program, tool costs, etc.
